

Siva Abhiram Veera

Web Developer & UX/UI Designer

As an engineering student at KL University, I am passionate about creating innovative web solutions and engaging user experiences. My journey combines academic knowledge with practical experience from internships and personal projects. Proficient in Figma, I design responsive, user-friendly interfaces and have a solid foundation in both front-end and back-end development. My understanding of artificial intelligence enhances my design approach, allowing me to integrate smart solutions. I thrive in collaborative settings, always eager to push the boundaries of design and technology.

WORK EXPERIENCE

Ai-ML Virtual internship Eduskills

11/2023 - 12/2023

The AI-ML Virtual Internship provided a comprehensive introduction to artificial intelligence (AI) and machine learning (ML) concepts, tools, and applications. Over the course of the internship, participants engaged in a variety of hands-on projects and learning modules designed to build practical skills and theoretical knowledge in the field.

AWS Academy Graduate - AWS Academy Machine Learning Foundations Aws

10/2023 - 11/2023

As an AWS Academy Graduate in Machine Learning Foundations, I completed a comprehensive program designed to provide a solid understanding of machine learning concepts and applications using Amazon Web Services (AWS). This course equipped me with the foundational knowledge and practical skills necessary to leverage machine learning in real-world scenarios.

Data Engineering Virtual Internship Aws

05/2024 - 06/2024

The Data Engineering Virtual Internship provided a comprehensive introduction to the principles and practices of data engineering, focusing on the design, development, and management of data systems. Throughout the internship, participants engaged in hands-on projects and collaborative learning experiences that equipped them with essential skills in data manipulation, storage, and processing.

Cyber Security with ethical hacking Rinex

01/2024 - 02/2024

learning the basics of computer systems, networking, and security concepts. cyber threats, vulnerabilities, and attack vectors TCP/IP, DNS, and HTTP, and how they can be used in security assessments. Continuously monitor security news, blogs, and industry publications to stay informed about the latest threats, vulnerabilities, and security best practices. meetups to learn from their experiences.

PERSONAL PROJECTS

Online Exam portal (11/2023 - 12/2023)

- Designed a user-friendly interface with secure login, exam creation, scheduling, and proctoring features to ensure the integrity of the examination process. All the latest attempts are stored in the sqlite database. Secure user authentication and role-based access controls (For administrators, instructors, and students) Detailed reporting and analytics dashboards for exam performance tracking Exam creation and scheduling tools for instructors to easily set up tests I have created the some prototype in the figma tool Figma Link: <https://www.figma.com/community/file/1335524733573934206> Link: <https://github.com/ABHIRAM5744/onlineexamination>

Some Figma Designs with prototype projects
